DETAILED ACTION

Status of Claims

1. Claims 1-22 are pending.
Claims 1-7 are rejected.
Claims 8 and 9 are objected.
Claims 10-22 are allowed.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on March 22, 2004 has been considered by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-7 are rejected under 35 U.S.C. 102(a) as being anticipated by Khrimian et al. (US 6,469,219 B1).

Khrimian et al. implicitly teach the claimed invention (see column 3, line 35 to column 4, line 28).

Allowable Subject Matter

5. Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 10-22 are allowed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nakazora et al. teach a method of removing and recovering a fluorinated alcohol, such as HFIP from a waste gas. In this method the alkoxide of the HFIP is converted to the free HFIP by adjusting the pH with an inorganic acid and the free HFIP is recovered from the acidic solution through distillation (see column 4, line 54 to column 5, line 40).

Kawai et al. (US 5,811,596) disclose that polyethers of the general formula (I) are produced as a by-product in the synthesis of fluoromethyl 1,1,1,3,3,3-hexafluoroisopropyl ether by a reaction of 1,1,1,3,3,3-hexafluoroisopropyl alcohol, formaldehyde and hydrogen fluoride in the presence of a dehydrator such as sulfuric acid (see column 1, line 34 to column 2, line 58). The by-products of the general formula (I) include HFIP hydrolysable precursor compounds, which are disclosed in instant claim 5.
